

# SETTING UP MAC OS X LAPTOP PRINTING

To print from your Apple laptop, running OS X, follow these steps:

1. First, connect to the wireless network using Odyssey after ensuring the computer is registered with CNU.
2. Go to <http://helpdesk.cnu.edu>
3. Click on the “[Setting up the Pharos PrintAnywhere Client for your computer](#)” link
4. Under the Getting Help Header [Mac OS X Pharos PrintAnywhere Client Download](#) for Mac OS X.
5. A dialog box will display prompting you to download a file. By default, Save to Disk is selected. Click OK to begin the file download.

6. After the download is complete, on your desktop, a file named “Popup.dmg” will show up once you click on the downloaded zipped file. Click on the unzipped file.

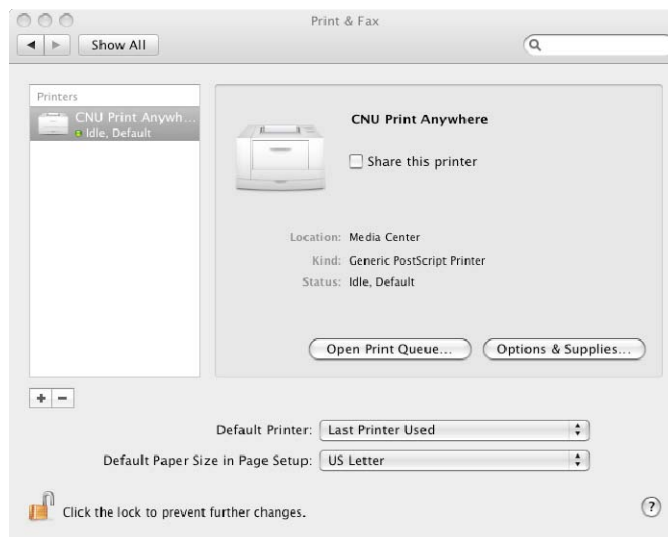

7. A window will open up showing the .PKG file. Click on this to begin the installation.

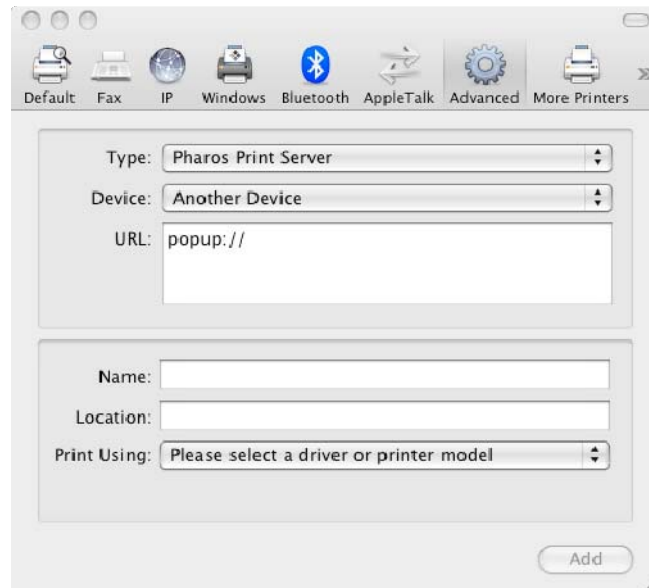

- The installation will prompt you two times to Continue and then the option to Install is shown.

- The Installation will tell you that it was complete successfully. You can then close the dialog box for the installation.
- From the System Preferences panel, click on the Print & Fax icon. Here you will add the printer queue for the Pharos printing system.

10. Click the “+” button to add the printer. Once clicked, select the Advanced button at the top of the panel.

11. Under type, select Pharos Print Server in the drop down menu. In the Name field, name the printer: CNU Print Anywhere 4350. Then click on Add.
12. You may print to the CNU Pharos Print server whenever you are on the “air-cnu” wireless network. To print, simply open the print dialog of any Mac OS X application and the printer you just configured will appear as a printer option.

13. Now you are ready to print using the Pharos print client. Once you click print, a dialog box that is program specific will pop up. Click Print for that and the Pharos dialog box will initiate.
14. A dialog box will pop up prompting you to give your print job a name (make it unique) and a password (keep it simple) so you can print the document. By the name you give your job, you will find your document on the Pharos print machine. If you have forgotten your password, you will have to reprint the item and remember another password. Old jobs are deleted after 30 minutes. You can print your job anywhere on campus that there is a Pharos machine.
